Refill

fillthechair.vercel.app

REFILL · APPOINTMENT RECOVERY DESK

Every cancelled appointment, filled again.

When a client cancels, Refill offers the time to the next person on the waitlist who fits it and said yes to messages. The first to accept gets it.

Refill Appointment Recovery Desk

Recover eligible cancellation slots without overbooking or contacting anyone who hasn't opted in.

WHO	Salon / tutoring-centre owner + reception staff
WHAT	Convert eligible cancellations into confirmed bookings
WHERE	One-calendar pilot · Hyderabad beachhead
WHEN	Triggered at cancellation; outreach before slot expires
WHY	Unused capacity = lost contribution · Manual recovery wastes staff time

PRODUCT

Five-feature recovery desk:

cancellation visibility → waitlist match → consent gate → rebook → audit trail

PRICE

₹499—₹699 / location / month

(hypothesis; willingness-to-pay to be validated with owners)

PLACE

Founder-led local demo

One Hyderabad calendar pilot

Software/consultant referral later

PROMOTION

Cancellation scenario demo

Recovered-contribution calculator

Consent + collision test proof

Solopreneurs Who Sell Their Time to High-Income Clients

PSYCHOGRAPHIC INSIGHT

"Rich people value time."

End customers who book premium salons place high value on convenience — making a relevant, opt-in waitlist offer credible.

SEGMENT	Independent salons, recurring appointments, service-duration constraints. Tutoring centres: adjacent, later.
TARGET	Owner-operated 1-location salon (3—15 staff). Recurring cancellations. Some waitlist demand. Hyderabad-first.
POSITION	Recovery-first, consent-first. Not a full salon ERP. Narrow job: fill eligible slots without overbooking or unauthorised outreach.

BEACHHEAD: INDEPENDENT SALONS

Sector	Independent salon • Recurring appts
Footprint	One location • 3—15 bookable staff
Cancellations	Recurring eligible • Measurable capacity
Waitlist	Customers willing to opt in
Constraints	Duration + staff skills capturable
Geography	One Hyderabad cluster first

P1 — Business side

OWNER + FRONT DESK · ECONOMIC BUYER & DAILY OPERATOR

Any appointment business: salons, clinics, tutoring centres, spas, studios.

`Low time` `Fragmented records` `Afraid of overbooking` `Front-desk multitasking` `Stale waitlist` `Competing requests`

Fill a freed slot fast, never double-book, and see what was recovered.

P2 — Client side

OPTED-IN END CUSTOMER

Anyone who books time: a haircut, a physio session, a tuition class.

`Wants a relevant offer` `Hates intrusive outreach` `Controls consent`

Hear about an earlier slot only after saying yes; book it in one tap.

[HYPOTHESIS] Segmentation assumptions to validate through owner interviews and pilot.

5 Main Features & Competitive Gap

01

Who-fits matching

Each waiting client is checked against the open slot: consent, staff skill, duration, availability. Fits listed in queue order; every skip shows its reason.

6 FIT · 11 SKIPPED

02

Consent gate

Yes / no / never asked: only yes is messaged. Checked when offers go out and again at booking. STOP withdraws every open offer at once.

TESTS C05 · C06 · C12

03

One slot, one booking

The booking is decided inside the database under a lock. Two taps at the same instant: one booking, the other client keeps their place.

RACE: 8 TAPS → 1 BOOKING

04

Offer rules

Offers held 15 min, then passed on. Max 3 offers per client a day. Under-2-hour cancellations flagged late. Mistakes undone. Owner sets every limit.

OWNER → RULES

05

Staff out & rescheduling

"I can't come in" withdraws that person's offers, holds their gaps and flags their clients. The desk moves them or sends a pick-a-time link.

LIVE · FLOW-TESTED

MANDATORY CASE SCORING CHECKS (C29)

10 pts	60-min request cannot occupy a 30-min slot — duration hard-constraint before any outreach	PASS · LIVE
10 pts	Two competing requests for one slot → one confirmed booking + one waitlist entry (no duplicate)	PASS · LIVE
5 pts	Customer without contact consent is excluded from outreach — logged with reason	PASS · LIVE

GAP vs competitors (Fresha, Zenoti, Square): Existing platforms offer waitlists but do not expose auditable consent-state, duration-mismatch rejection, or slot-contention proof to the operator. Validate by demo before claiming.

Onboarding + What Does a Day on Refill Look Like?

ONBOARDING · IN THE APP

1 Create account

Email + password, then "I run a business".

2 Set up the business

Name and type, services (minutes, price), team and working hours. Any appointment business.

3 Share the links

Front-desk login link, a private link per staff member, the client booking page + QR (yes / no to messages, never pre-ticked).

4 Set the rules

Offer hold 15 min · 3 messages per client a day · late if under 2 h · no offers inside 10 min. Owner can change all.

A DAY ON REFILL · FRONT DESK

Open Today

The Day Dial: every staff ring, every booking; "needs you now".

Client cancels

Desk records it. The gap turns amber with ₹ at stake; late if under 2 h.

Who fits

Fits in queue order; every skip with its reason.

Send offers

One tap. Held 15 min; max 3 a day per client.

Client books

One tap on their phone. Two taps at once: one booking.

Slot refilled

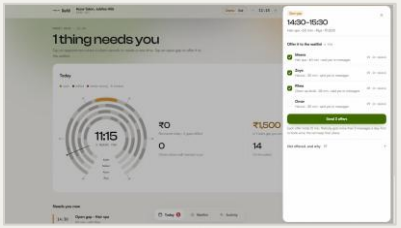

Lime on the dial; the owner sees ₹ recovered.

Staff out?

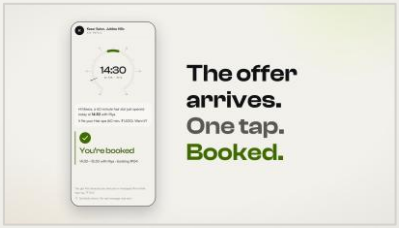

Their clients flagged; desk moves them or sends a link.

EVIDENCE TRAIL SAVED AT EVERY STEP

Every cancellation, offer (sent or skipped, with its reason), booking, expiry, move and undo is logged automatically. Export as CSV or JSON for the owner; live businesses archive each day into History.

CLIENT · ONE-TAP BOOKING

Pricing Hypothesis & 30-Day Experiment

₹699

/location/month

CORE

Core workflow + consent log
Service/staff constraints
Duplicate protection

[HYPOTHESIS] Base price

WHY

₹699 is an ANCHOR for owner discovery interviews — not a final list price.

Test at ₹499, ₹699 and ₹999. Concrete paid-pilot decision is the only real validation. Stated interest ≠ willingness to pay.

₹499	₹699 · ANCHOR	₹999

VALUE FORMULA: Monthly recovered contribution = Completed recovered appts × Contribution/appt − Incremental messaging / platform / recovery costs

Example: At ₹500 contribution/service → need ~2 recovered bookings/month to justify ₹699 subscription after costs.

UNIT ECONOMICS (ILLUSTRATIVE)

Price per location	₹699 / month (test ₹499—₹999)
Cost to serve	Low: hosting + messages
Contribution margin	High, software-like
Acquisition cost	Low early: founder-led demos
Payback	Within the first months
Lifetime value	Rises with retention
Break-even	A few hundred active locations

VOICE OF CONSUMER

- 5 consenting role-players • pseudonymous IDs

RP-01 RP-02 RP-03 RP-04 RP-05

[HYPOTHESIS] Price to be tested with owners; 5 role-players ≠ market validation of WTP.

Go-to-Market Strategy & Financial Projections

WEEK 1 — Rule Verification
Pass all 3 case checks. Fix duration/consent/concurrency issues. Save evidence.

WEEK 2 — Role-Player Test
5 consented participants. Record approach, response, usefulness. No market-size conclusions.

WEEK 3 — Owner Baseline
Secure one salon permission. Capture cancellation volume and manual effort baseline.

WEEK 4 — Pilot + Proof
Supervised one-calendar run. Measure fill rate, no-show, correction effort, contribution.

FINANCIAL PROJECTIONS

₹ Lakh	Year 1	Year 2	Year 3
Avg Locations	50	250	800
Revenue	4.19	20.97	67.10
Variable COGS	0.60	3.00	9.60
Gross Profit	3.59	17.97	57.50
Total OpEx (revised)	15.00	27.00	49.00
EBITDA	-11.41	-9.03	+8.50

Revenue = avg locations × ₹699 × 12 · COGS ₹100 / location / month

RISK MITIGATION · THE THREE STAR FEATURES

Duration & staff fit
Risk — Wrong durations or skills entered at setup lead to wrong offers.
Fix — Owner sets minutes per service; database re-checks fit at send and at booking; every skip shows its reason.

One slot, one booking
Risk — A phone or walk-in booking outside Refill collides.
Fix — Desk adds every booking in Refill; slot lock + unique index; daily log export to reconcile.

Consent
Risk — A client withdraws consent through another channel.
Fix — Client sets yes / no themselves (never pre-ticked); STOP withdraws all offers at once; consent time and source logged; 3-a-day cap.
